## About this Course

4,700,944 recent views

Machine learning is the science of getting computers to act without being explicitly programmed. In the past decade, machine learning has given us self-driving cars, practical speech recognition, effective web search, and a vastly improved understanding of the human genome. Machine learning is so pervasive today that you probably use it dozens of times a day without knowing it. Many researchers also think it is the best way to make progress towards human-level AI. In this class, you will learn about the most effective machine learning techniques, and gain practice implementing them and setting them to work for yourself. More importantly, you'll learn about not only the theoretical underpinnings

### SKILLS YOU WILL GAIN

Logistic Regression

Artificial Neural Network

Machine Learning (ML) Algorithms

Machine Learning

### Learner Career Outcomes

11%

started a new career after completing these courses

15%

got a tangible career benefit from this course

### Flexible deadlines

Reset deadlines in accordance to your schedule.

### Shareable Certificate

Earn a Certificate upon completion

### 100% online

Start instantly and learn at your own schedule.

**Approx. 61 hours to complete**

### English

Subtitles: Arabic, French, Portuguese (European), Chinese (Simplified), Italian, Vietnamese, German, Russian, English, Hebrew, Spanish, Hindi, Japanese
